

IKEA India Playwright Automation Test Cases

Homepage & Navigation Module

TC ID	Detailed Test Case
TC_001	Verify IKEA homepage loads successfully within acceptable time
TC_002	Verify navigation menu redirects to correct category pages
TC_003	Verify homepage promotional banners redirect correctly
TC_004	Verify hamburger menu expands and collapses correctly
TC_005	Verify footer links navigate to expected pages
TC_006	Verify browser back navigation works correctly
TC_007	Verify browser forward navigation works correctly
TC_008	Verify page refresh does not break homepage layout
TC_009	Verify category navigation persists after page reload
TC_010	Verify no broken images are displayed on homepage
TC_011	Verify homepage layout remains stable on different browsers
TC_012	Verify homepage loads correctly after clearing cache and session

Authentication & Account Flow Module

TC ID	Detailed Test Case
TC_013	Verify login modal opens successfully
TC_014	Verify validation message appears for invalid email format
TC_015	Verify mandatory field validation for empty login form
TC_016	Verify password field masks entered characters
TC_017	Verify login button remains disabled for incomplete details
TC_018	Verify account creation form opens successfully
TC_019	Verify user can enter sample registration details successfully
TC_020	Verify invalid mobile number validation during registration
TC_021	Verify password mismatch validation message appears
TC_022	Verify invalid characters are not accepted in email field
TC_023	Verify sample account creation redirects user appropriately
TC_024	Verify duplicate email registration is handled gracefully
TC_025	Verify tab navigation works across registration fields

TC ID	Detailed Test Case
TC_026	Verify login/account modal responsiveness on mobile viewport
TC_027	Verify account modal can be reopened multiple times without UI issues

Search Functionality Module

TC ID	Detailed Test Case
TC_028	Verify valid product search displays relevant results
TC_029	Verify invalid keyword search displays no-result handling
TC_030	Verify partial keyword search returns matching products
TC_031	Verify search suggestions appear dynamically while typing
TC_032	Verify search results update after pressing Enter
TC_033	Verify search functionality is case insensitive
TC_034	Verify special character search is handled gracefully
TC_035	Verify multiple consecutive searches work correctly
TC_036	Verify search URL updates dynamically after search
TC_037	Verify clearing search input resets product results
TC_038	Verify search results remain consistent after refresh
TC_039	Verify search input handles long strings correctly
TC_040	Verify search functionality works correctly on mobile viewport
TC_041	Verify search results contain valid product cards
TC_042	Verify no broken product cards appear in search results

Product Listing & Categories Module

TC ID	Detailed Test Case
TC_043	Verify category pages load successfully
TC_044	Verify product cards display correct product information
TC_045	Verify product prices are displayed correctly
TC_046	Verify product images load successfully
TC_047	Verify breadcrumb navigation updates correctly
TC_048	Verify category switching updates displayed products
TC_049	Verify clicking product card opens correct product details page
TC_050	Verify lazy loading loads additional products during scroll

TC ID	Detailed Test Case
TC_051	Verify category product count updates dynamically
TC_052	Verify unavailable products display correct stock messaging
TC_053	Verify category pages maintain layout consistency
TC_054	Verify category navigation works after page refresh
TC_055	Verify product listing remains stable during rapid scrolling
TC_056	Verify product cards maintain alignment on different resolutions
TC_057	Verify category URLs update correctly during navigation

Product Listing & Filters Module

TC ID	Detailed Test Case
TC_058	Verify price filter updates displayed products correctly
TC_059	Verify multiple filters can be applied simultaneously
TC_060	Verify filter application updates product count dynamically
TC_061	Verify filters persist after browser refresh
TC_062	Verify clearing filters resets product listing
TC_063	Verify sorting low-to-high updates product order correctly
TC_064	Verify sorting high-to-low updates product order correctly
TC_065	Verify category filters display relevant products only
TC_066	Verify availability filters remove unavailable products
TC_067	Verify filter panel opens and closes correctly
TC_068	Verify filter selections persist during scrolling
TC_069	Verify filter application updates URL dynamically
TC_070	Verify removing one filter updates remaining results correctly
TC_071	Verify filter drawer works correctly on mobile viewport
TC_072	Verify filtered results remain stable after page reload

Product Details Module

TC ID	Detailed Test Case
TC_073	Verify product details page loads successfully
TC_074	Verify product image gallery functions correctly
TC_075	Verify image carousel navigation updates displayed image

TC ID	Detailed Test Case
TC_076	Verify product description is displayed correctly
TC_077	Verify product specifications are displayed correctly
TC_078	Verify product dimensions information is visible
TC_079	Verify quantity selector updates selected quantity correctly
TC_080	Verify Add to Bag button updates cart successfully
TC_081	Verify related products section displays correctly
TC_082	Verify delivery information is displayed properly
TC_083	Verify breadcrumb navigation works from product page
TC_084	Verify product availability messaging updates correctly
TC_085	Verify zoom functionality works on product images
TC_086	Verify product page responsiveness across devices
TC_087	Verify refreshing product page retains selected product data

Cart & Checkout Flow Module

TC ID	Detailed Test Case
TC_088	Verify product can be added to cart successfully
TC_089	Verify cart item count updates after adding products
TC_090	Verify multiple products can be added to cart
TC_091	Verify increasing quantity recalculates subtotal correctly
TC_092	Verify decreasing quantity recalculates subtotal correctly
TC_093	Verify removing product updates cart total correctly
TC_094	Verify duplicate products are handled correctly in cart
TC_095	Verify cart persists after browser refresh
TC_096	Verify continue shopping redirects correctly
TC_097	Verify empty cart message appears after removing all items
TC_098	Verify user can proceed from cart to checkout page
TC_099	Verify checkout summary displays correct products and totals
TC_100	Verify mandatory address field validation during checkout
TC_101	Verify invalid postal code validation message appears
TC_102	Verify entered checkout details persist after refresh
TC_103	Verify guest checkout navigation works correctly

TC ID	Detailed Test Case
TC_104	Verify shipping information updates order summary dynamically
TC_105	Verify navigating back from checkout retains cart data

API & Session Validation Module

TC ID	Detailed Test Case
TC_106	Verify product search API returns successful status code
TC_107	Verify search API response contains expected product data
TC_108	Verify product listing API response time is within acceptable limit
TC_109	Verify failed search requests are handled gracefully
TC_110	Verify duplicate API requests are not triggered unnecessarily
TC_111	Verify cart API/network request is triggered after adding product
TC_112	Verify API response payload contains required product fields
TC_113	Verify cart session persists after browser refresh
TC_114	Verify cookies are stored correctly after cart interaction
TC_115	Verify localStorage retains cart and session information
TC_116	Verify browser back navigation maintains cart state
TC_117	Verify browser forward navigation restores correct page state
TC_118	Verify session data clears correctly after browser close or logout
TC_119	Verify no critical console errors appear during user workflows
TC_120	Verify temporary network interruption does not crash application

Responsive UI Validation Module

TC ID	Detailed Test Case
TC_121	Verify homepage layout adjusts correctly on mobile viewport
TC_122	Verify homepage layout adjusts correctly on tablet viewport
TC_123	Verify product cards resize correctly on smaller screens
TC_124	Verify navigation menu switches to hamburger menu on mobile
TC_125	Verify cart drawer responsiveness on mobile devices
TC_126	Verify checkout page remains usable on smaller resolutions
TC_127	Verify text and buttons remain aligned after browser resize
TC_128	Verify product images scale correctly across resolutions

TC ID	Detailed Test Case
TC_129	Verify search bar responsiveness on tablet devices
TC_130	Verify filter drawer responsiveness on mobile viewport
TC_131	Verify responsive layout remains stable during orientation changes
TC_132	Verify footer sections remain accessible on smaller screens
TC_133	Verify no overlapping UI components appear on responsive layouts

Total Test Cases: 133
